

**Product:** Spatia  
**Manufacturer:** Arclinea  
**Designer:** Antonio Citterio  
**Architonic ID:** 2046570

**Description:**

With Spatia the kitchen is increasingly the centre of the home. A kitchen that evolves and becomes discreet. Bringing a new angle to interiors, pushing living horizons to conceal its functions, Spatia elegantly and harmoniously suggests a modern landscape for the home.

The Spatia living/kitchen service island is a central multi-functional element providing a focal point for interior design, thanks to the use of the Pocket recessed-door system, making it easier to plan integrated kitchen and living areas, increasing space in small and studio apartments. All the functions of the home can exist around the island: starting with the kitchen, cooking, washing and preservation areas and moving on to the living area, ending up with storage space, laundry, wardrobe, bathroom.

Spatia in a linear layout with wall-mounted base units and sliding doors in shiny thermal plastic with vertical Elipsia handle, housing a pull-out wire drawer system. 4 cm thick worktop in stainless steel, 6 m long and 70 cm deep, with a sliding rail for the doors housed under the lower edge. The sink, worktop waste bins and hobs are all welded. Exclusive Arclinea mixer in stainless steel. Stainless steel back panel and 12 cm stainless steel canopy shelf with side extraction. Right and left, the Closet zones have sliding doors to hide a washing area for pots and pans and the electrical appliances: oven, fridge/freezer.
